

## **HU-Planning a Safe Return to Hockey**

For the 2022-2023 season, bench staff are still required to have completed HU-Planning a Safe Return to Hockey. If you have completed this course previously, you are not required to complete again at this time.

This free 1-hour course offers an overview of Hockey Canada's Return to Hockey Safety Guidelines as part of the Covid-19 response. The program looks at some key information our membership needs to know to help reduce the risk of COVID-19 in the hockey environment. It encourages all members to become familiar with the Public Health Authority guidelines and restrictions and the Hockey Canada Safety Guidelines.

To complete this course:

- Please ensure you have a Hockey Canada Registry (HCR) account set up before completing the course - [HCR 3.0 - Hockey Canada Registry](#).
- Go to Hockey University and register for HU-Planning a Safe Return to Hockey, hosted by Hockey Nova Scotia. Link to course: [HCR 3.0 - Hockey Canada Registry](#)

The deadline, as set by Hockey Nova Scotia, for completion of this course is **December 1**. **Failure of a volunteer to complete this course will result in the suspension from their volunteer role with any team until such a time when the course is completed.**
